

OKWEIRD

WHITEPAPER

THE ORIGIN

Many might ponder, what encapsulates OKWeird. The term "Weird Flex But OK" originated as an internet meme on Twitter in 2017, gaining popularity as a sarcastic retort to unconventional or ostentatious displays of pride or accomplishment. This meme encapsulates a blend of humour, scepticism, and acknowledgement, providing a perfect parallel to the current state of the blockchain ecosystem. In the spirit of this meme, OKWeird aims to leverage the whimsical and engaging nature of meme culture to draw attention to and celebrate the innovative, disruptive, and often overlooked features of blockchain technology. By doing so, it seeks to revitalize interest and confidence in blockchain's core values and potential.

PURPOSE

The primary purpose of OKWeird is multi-fold

- To serve as a reminder of the revolutionary aspects of blockchain technology that extend beyond its financial applications.
- To enhance the perception and understanding of meme coins within the cryptocurrency community, this paper highlights their potential to make meaningful contributions to the blockchain ecosystem. These contributions extend to art, games, real-world assets (RWAs), and many other areas."
- Through these objectives, OKWeird is not just a token but a movement aimed at reinforcing the foundational principles and utilities of blockchain technology.

CORE THESIS

The blockchain space has long celebrated the revolutionary, the novel, and the outright unexpected. In this tradition, the "OKWeird" token embodies a commitment to bring back the original spirit of blockchain — a technology envisioned not merely as a ledger, but as a platform for innovation, expression, and community empowerment.

"OKWeird" is not just a token; it's a cultural artifact, a nod to the ethos of blockchain as a transformative force. It is designed to disrupt the status quo and pivot the focus back to the essential elements that made the blockchain space so intriguing and full of potential.

Our aim with "OKWeird" is to foster a truly decentralized community. Rather than sitting idle in the wallets of the few, "OKWeird" will circulate among the many — the creators, the users, the advocates — who champion the everyday use and grassroots development of blockchain applications.

In the spirit of shared success and collective ownership, a significant portion of "OKWeird" tokens will be distributed to those who embody the blockchain's innovative spirit: developers, digital artists, NFT collectors, DeFi enthusiasts, gaming communities and many more. These are the individuals and groups that will not only use "OKWeird" but will also drive its narrative and utility forward.

The remainder of the token allocation is strategically designed to incentivize on-chain activity, support the growth of the ecosystem, and reward long-term commitment to our cause. Through this, we plan to invigorate the use of decentralized exchanges and tools, encourage the adoption of non-custodial wallets, and actively engage in community-driven initiatives.

To ensure alignment with our long-term vision, contributors to the "OKWeird" project will be incentivized through a transparent and fair vesting schedule. Their dedication to the cause is paramount, and their rewards will be commensurate with their commitment to making "OKWeird" a symbol of blockchain's original promise — freedom, empowerment, and a little bit of irreverence.

"OKWeird" is more than a meme coin; it's a reminder, a statement, and a celebration of the essence of blockchain. Join us in flexing the power of blockchain, in the most unconventional way possible

THE UTILITY

Embracing Novelty with Purpose :

The OKWeird token represents more than a fleeting internet trend; it is an homage to blockchain's latent potential, set to revitalize the values and utility of this transformative technology. With the same subversive charm as its meme origin, OKWeird flexes the novel applications and underappreciated facets of blockchain in a manner that's both impactful and irreverent.

Utility in the Ecosystem :

The utility of OKWeird spans several dimensions within the Blockchain ecosystem :

Community Empowerment: Reflecting the grassroots nature of its meme heritage, OKWeird is used as a tool to acknowledge and reward community engagement, creativity, and contributions to the Blockchain network.

Incentivization for Growth: By increasing Total Value Locked (TVL) and Unique Active Wallets (UAW), OKWeird acts as an incentive for new and existing users to explore and adopt the latest projects.

OKWeird remains at the forefront of blockchain innovation by integrating with the most novel projects, thereby expanding the blockchain's user base, Total Value Locked (TVL), and Unique Active Wallets (UAW). Our partnership program encompasses a wide range of cutting-edge ventures, from DeFi protocols and NFT marketplaces to gaming communities and real-world assets. This initiative aims to promote usage and enhance user engagement across various platforms by incentivizing more projects to emerge.

Looking ahead, OKWeird is set to leverage the strengths of blockchain technology in ways that inspire, engage, and celebrate its community. This is all made possible by the OKWeird DAO, which serves as the epicentre of the "Weird Flex But OK" ecosystem. The DAO will be instrumental in launching initiatives conceived by the broader OKWeird community. To facilitate this, a specific DAO instance will be established to control the further distribution and allocation of OKWeird tokens for these initiatives. Program authority over the token will be delegated to the DAO, with guidance from token holders moving forward.

TOKENOMICS

THE 50% AIRDROP WILL BE SPLIT AS FOLLOWS :

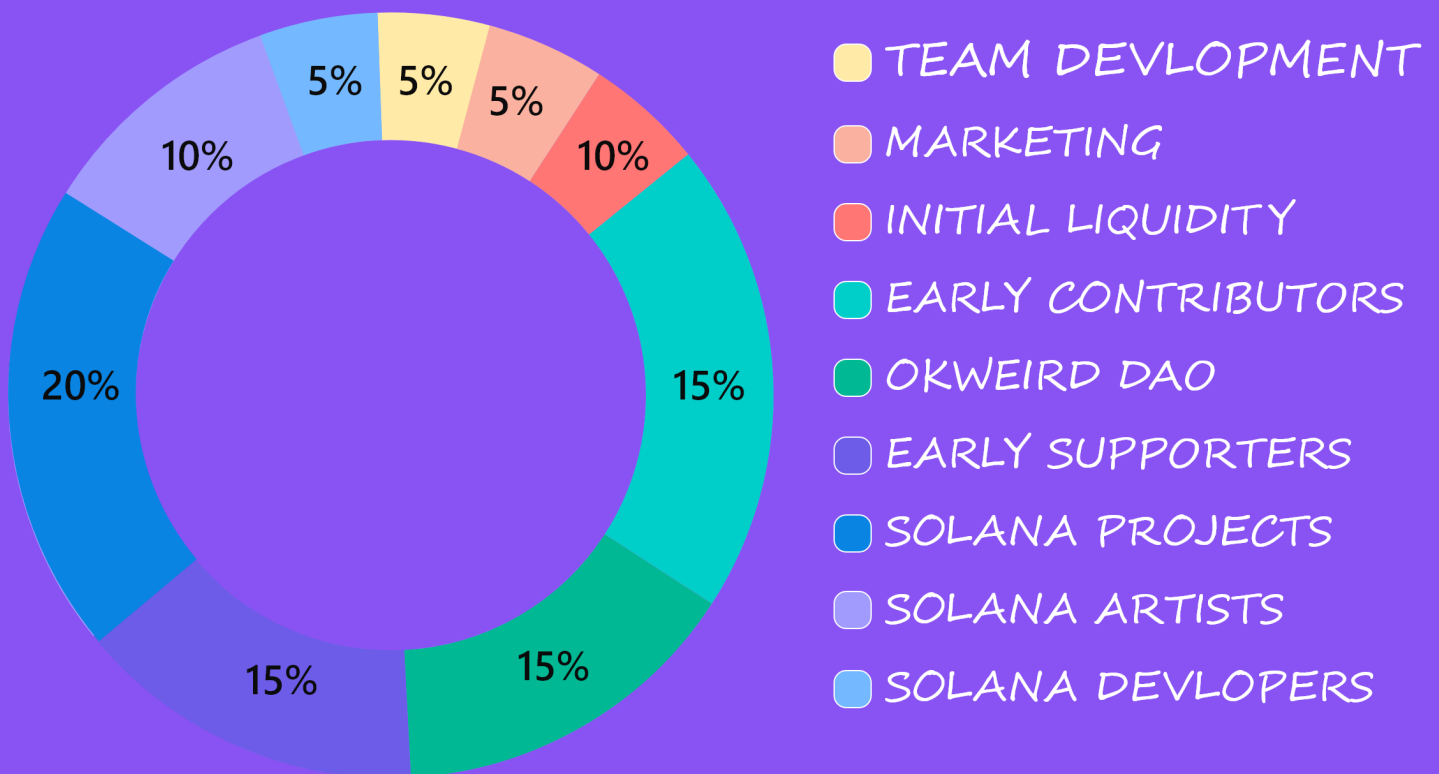

5% SOLANA DEVELOPERS

15% EARLY SUPPORTERS & OPENBOOK TRADES

20% SOLANA PROJECTS

10% SOLANA ARTIST

SUPPLY WILL BE DISTRIBUTED AS FOLLOWS :
